

TIRE SPREADER 5045/5035

Branick®

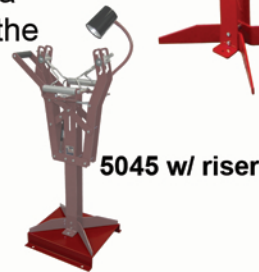

Proudly Made
in the U.S.A.

High performing passenger and light truck tire spreader!

The Branick 5045 Tire Spreader is the solution for your Low-Pro and Wide-Base tire customers! This versatile spreader features a new design that is beyond efficient. The high-impact industrial light is mounted on a flexible arm making it easier for inspection and repair. It uses a CFL bulb that is RMA compliant, meaning our bulbs emit a minimum of 200 foot candles, which the RMA requires for proper tire repairs. The popular quick saw-tooth adjustments and the zinc plated rollers make this model a perfect mix of new technology and old comfort. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!

**Model 5035 also available - same as 5045 minus gas spring and rollers.

*Branick bulbs emit a minimum of 200 foot-candles, which is required for tire repair.

FEATURES

Cushioning gas spring..... Controlled tension release to avoid snap-back on tough sidewalls
Durable zinc plated rollers..... Easily rotate tire to locate the repair point
Ergonomic handle..... Quick and easy spread of tire and reduced footprint
Made in the U.S.A.....3-year warranty!*

OPTIONS

Storage cabinet..... Keep repair tools and supplies organized
LED bulb..... More energy efficient; no CFL disposal issue
Riser platform..... Increased work height
